## FOREWORD

Selected Medical Care Statistics (SMCS) is a quarterly publication prepared by the Washington Headquarters Services, Directorate for Information Operations and Reports (WHS/DIOR) of the Office of the Secretary of Defense.

SMCS presents quarterly summary data concerning medical care provided at fixed military medical facilities located in: (1) the United States (including Alaska and Hawaii) and (2) outside the United States, in territories, possessions, and foreign countries. This publication contains pie charts which are based on the percentage of the DoD worldwide total for each of the categories. Admissions and beds occupied by dependents of other uniformed personnel (Public Health Service (PHS), Coast Guard (CG), National Oceanic Atmospheric Administration (NOAA)) are less than one percent and are included in the "other" category on applicable charts and graphs.

This annual fiscal year edition also contains consolidated data for fiscal year 1993 as well as five year comparison tables for fiscal years 1989 - 1993. Fiscal year data for operating beds, operating bassinets, and beds occupied are generated by averaging the quarterly sets of data received during the fiscal year.

This publication is generated from a data base developed and maintained in consonance with Department of Defense Instruction (DoDI) 6015.14, July 13, 1990, under Report Control Symbol DA&M(Q)1474, by the Manpower Management Information Division of WHS/DIOR.

FIGURE 9.1

## GLOSSARY

Admission. The act of placing an individual under treatment or observation in a hospital. The day of admission is the day on which the hospital makes a formal acceptance of the patient who is to be provided with room, board, and continuous nursing service in an area of the hospital where patients normally stay at least overnight. While the admission of a newborn is deemed to occur at time of birth, these neonates are reported separately and excluded from the admission data.

Average Daily Patient Load (ADPL). Average number of inpatients in the hospital and receiving care each day during a reported period. Included are patients on pass or liberty not in excess of 72 hours and patients admitted and discharged on the same day. Excluded are newborns, patients on convalescent leave, and patients authorized to subside out. ADPL is calculated by dividing the number of occupied bed days during the period by the total number of days in the reported period.

Bassinets Day. A day spent in the newborn nursery by a healthy infant. This excludes days spent by infants in equipment referred to as a bassinets on any pediatric nursing unit, pediatric intensive care unit, or other nursing unit.

Live Births. The complete expulsion or extraction from a mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life such as heartbeat, umbilical cord pulsation, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached. Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps.

Operating Bed. Accommodation in a functioning medical treatment facility that is currently set up and ready in all respects for the care of a patient. It must include supporting space, equipment, medical material, ancillary and support services, and staff to operate under normal circumstances. Excluded are transient patient beds, bassinets, incubators, labor beds, and recovery beds.

Outpatient Visit. A hospital program for the performance of elective surgical procedures on patients who are not admitted to the hospital as inpatients.
